

Coming to the Inland Empire in 2018

“Revolutionary Futurist”

Peter Russell

From Science to God

“Nothing in Western science predicts that any living creature should be conscious. It is easier to explain how hydrogen evolved into other elements, how they combined to form molecules and then simple living cells, and how these evolved into complex beings such as ourselves, than it is to explain why we should ever have a single inner experience.”

– Peter Russell

A presentation of the New Thought Music Festival’s ongoing “Science and Spirituality” lecture series, featuring leading thinkers dissolving the boundaries between art and science; the felt and the known.
