The Moral Molecule with Dr. Paul Zak

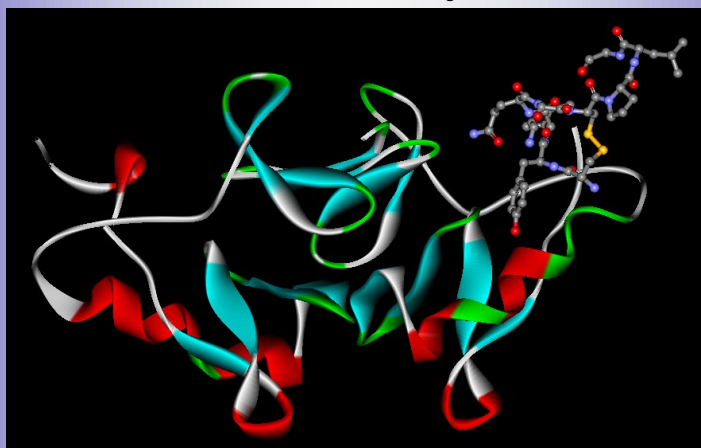

Saturday, October 27, 2012 - 2 PM - Johnson Hall

Riverside Community Center for Spiritual Living

Fairmount Boulevard and Ridge Road, Riverside, CA

Admission is free, a love offering will be taken

A Revolution in the Science of Good and Evil

Why do some people give freely—while others are cold hearted?

Why do some people cheat and steal—while others you can trust with your life?

Why are some husbands more faithful than others—and why do women tend to be more generous than men?

Could the key to moral behavior lie within a single molecule?

From the bucolic English countryside to the highlands of Papua New Guinea, from labs in Switzerland to his campus in Southern California, Dr. Paul Zak recounts extraordinary stories and sets out, for the first time, his revolutionary theory of moral behavior.

Accessible and electrifying, The Moral Molecule reveals nothing less than the origins of our most human qualities—empathy, happiness, and the kindness of strangers.

This ongoing lecture series discusses a number of amazing findings and scientific theories dealing with both the origin and nature of the universe and the power of the human mind. Presented by the New Thought Music Festival in cooperation with the Riverside Community Center for Spiritual Living.
